**DETAILED ACTION**

1. Claims 12-22 have been cancelled by the Preliminary Amendment filed November 14, 2000.

Claims 1-11 are pending.

***Election/Restriction***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a sales system for presenting advertisements to a user and allowing the user to make purchases electronically, classified in class 705, subclass 26.
  - II. Claims 5-11, drawn to a payment system in which payment order authentication is based on the identification of the sender of the payment order, classified in class 705, subclass 75.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as authorizing purchases without performing payment order authentication based on the identification of the sender of the payment order. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
